

Chun-Yu (Echo) Shih

Product Engineer · React · TypeScript · FastAPI · Product Ownership

Taipei, Taiwan · echoshihtw@gmail.com · linkedin.com/in/echoshihtw · github.com/echoshihtw · echoshihtw.github.io/portfolio

Summary

Product-minded full-stack engineer who turns ambiguous operational needs into shipped software. Owns delivery across React/Next.js frontends, FastAPI services, data models, testing, and CI/CD, using controlled AI-assisted workflows to accelerate implementation while keeping architecture and verification explicit.

Experience

Lockerbie Technology

Full-Stack Engineer — Internal Platform

Taipei, Taiwan · Dec 2024 – Present

- Built and operate an early-stage internal project-management platform used by ~5 team members across 10 projects, as one of two engineers — **Next.js** / **TypeScript** frontend, **FastAPI** / **Python** services, and Docker-based infrastructure.
- Implemented the team's **event-driven modular-monolith** architecture, learning **RabbitMQ** and **ArangoDB** to connect bounded modules and model complex project relationships in production.
- Given a requirement that layers stay independent, chose **Next.js App Router** and introduced a **BFF trust boundary** so browser clients call only same-origin API routes; kept backend tokens in **HttpOnly cookies** and centralised **CSRF** enforcement for unsafe requests.
- Designed the permission layer over the platform's role edges: org-level **RBAC** plus project-scoped **PBAC**, resolving a user's roles into permissions and frontend capability flags so services don't each reimplement access logic. Built dual client/vendor workflows and an administrative graph view; covered with **Vitest**, **React Testing Library**, and **pytest**.
- Built a local **Claude Code** workflow using reusable skills and automated hooks to accelerate implementation and testing, while keeping final verification in deterministic quality checks.
- Introduced **build-once, promote-by-digest** delivery with **GitHub Actions** and **GHCR**, reducing three environment rebuilds to one and promoting the exact image tested in staging.

SPIN.FASHION by Lablaco

Full Stack Engineer & Founding Partner

Singapore · Remote · Aug 2024 – Oct 2024

- Resolved a macOS **Electron code-signing, notarisation, and auto-update** release blocker, then documented the deployment workflow for repeatable production releases across a distributed team.

Find Recruiter

Software Engineer

Taipei, Taiwan · Aug 2022 – May 2024

- Led frontend delivery for a **B2B recruitment and ATS platform** built with **React** and **TypeScript**, working in a two-engineer product team and reporting directly to the CTO.
- Drove an incremental **JavaScript-to-TypeScript** migration and built **100+ reusable components**, improving consistency and reducing type-related regressions across a large production codebase.

Independent / Freelance Engineering

Product Engineer

Remote · 2020 – Present

- Built product experiences across fintech, research, e-commerce, and creative industries, including the **Next.js frontend for a Bitcoin coin-selection research tool** developed with a **BDK core maintainer**.

Projects

Clio — *Founder / Product Engineer* · Bilingual **React/Supabase** salon operations product in daily use at a Tainan salon since **May 2025**, supporting 603 clients and 2,694 service records with **Postgres RLS** and per-member permissions.

Runway — *Founder / Product Engineer* · Personal financial-runway app in **Flutter: Clean Architecture** across a Melos monorepo, **SQLCipher**-encrypted local storage, 7-language localisation. In development — running on Android, iOS distribution in progress.

Skills

Frontend — React · Next.js · TypeScript · TanStack Query · Zustand · Redux · MUI · Tailwind CSS

Backend & Data — FastAPI · Python · Node.js · Postgres · ArangoDB · Supabase · RabbitMQ · SQLite

Infra & Quality — Docker · GitHub Actions · GHCR · AWS · Vitest · React Testing Library · pytest · Claude Code

Mobile / Desktop — Flutter · Dart · Tauri · Electron

Education

B.A. Italian Language and Culture — Fu Jen Catholic University, Taipei · 2019
